Profile

I'm currently pursuing an Integrated MBA with a specialization in Computer Engineering from Nirma University. I bring a blend of technical know-how, adaptability, and people skills to the table. I'm on a journey to grow as a tech-savvy professional who can bridge the gap between business and technology — and have fun doing it!

Projects

E-commerce Website 04/2025 – 04/2025

Online shopping website

A full-stack web app with secure login, MongoDB storage, and Razorpay integration, showcasing modern development using Node.js, Express, and dynamic user-friendly interfaces.

Underwater Data Communication 04/2025 – 04/2025

This Python simulation visualizes underwater data communication, showing how packets are sent, delayed, or lost, with real-time stats, user controls, and an interactive interface.
